Natural Gas

Condensation of Vapor

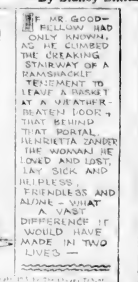

Over Ninety per cent. of those using gas for cooking or heating are obtaining the utmost satisfaction. Those who are not, will find the cause to be one of the following:

- 2.---Cooking Ranges improperly vented.
- 3.---Vent pipe from gas appliance to chimney too small.
- 4.---Lining in chimney too small.
- 5.---Improper operation of appliances—such as too close checking of drafts, insufficient air in mixing.
- 6.---Insufficient air allowed to enter outside of burner to support combustion.
- 7.---Leaky furnaces.
- 8.---Smothering fires with brick.

A number of gas appliances are now being sold which have inadequate vents and are not suitable for our weather conditions. Before making purchases, call at our office and we will be pleased to advise you.
